ACADEMIC PROJECTS

- **Gym Crowdedness Analysis**

This Analysis was done to predict how crowded the gym will be in the future. The analysis included EDA and Feature Ranking. GitHub

- **Car Number Plate Detection Using MATLAB and Image Processing.**

The ANPR (Automatic Number Plate Recognition) system is based on image processing technology. The main objective here is to design an efficient automatic vehicle identification system by using vehicle number plate. GitHub

- **Personal Portfolio: rohitdubey03.github.io**

Developed this website from scratch. It is made with HTML/CSS, JavaScript. The website is a showcase of my projects and abilities. [GitHub](#)

- **Brain Tumor Extraction from MRI Images Using MATLAB (Ongoing)**

The main theme of the project is to extract the brain tumors from the MRI images with some noise removal functions, segmentation and morphological operations which are the basic concepts of image processing using MATLAB software. [GitHub](#)
